RECAST SOFTWARE

Public Roadmap View

Recast Software

Empowering IT at every endpoint

Advance Fundamental Tools
Enrich daily tools that simplify work and save time

Satisfy Co-Managed Environments
Efficiently manage endpoints across SCCM and Intune

Deliver New Applications
Introduce new security driven solutions that help keep organizations safe every day

Improve reporting insights
Visualize and target compliance needs to reduce risk

RECAST SOFTWARE

2023 Recast Software Investments

Advance Fundamental Tools

- Improve user experience
- Advance security integrations
- Increase efficiencies through better automation

Satisfy Co-Managed Environments

- Manage devices across Intune and SCCM within the Configuration Manager Console
- Deliver beloved RCT capabilities for all endpoints

Deliver New Applications

- Increase security and control admin rights with Recast Privilege Manager
- *Coming Soon! Recast Application Manager aids to seamlessly patch applications*

Improve Reporting Suite

- Improved functionality, load times, and deliverability
- Cohesive reporting across SCCM Console and RMS to serve different users

2023 Overview

Priority	Drivers	Up Next		Soon to Follow		Late 2023
Advance Fundamental Tools	• Deliver high ROI • Continuous improvement for tools that impact daily work	Delivery of highly requested feature ideas	In app Builder templates Security Improvements	Improve Builder automation Enhance collections capabilities		Broaden security abilities/toolset
Satisfy Co-Managed Environments	• Deliver highest value actions for all endpoints • Increase simplicity and efficiency	Delivery initial Right Click Tools features needed to serve both Intune and SCCM devices		BETA test group	Further feature delivery	Portal updates
New Product Additions	• Single vendor to help improve security and compliance • Drive ongoing efficiencies for many users	Recast Privilege Manager Integrated access management		Patching and automatic updates for Recast apps in SCCM Access Mgmt reporting tools	Recast Application Manager allowing patching for SCCM managed devices	Patching for Intune managed devices
Improved Reporting Insights	• Insight driven workload savings • Enhance user experience	Performance improvements and RMS updates		Endpoint Insights UI updates		Improved PAM reporting
